

By integrating the issue of carbon flow in trade with the life cycle carbon footprint analysis of lithium battery, this study provides new insights for reducing carbon emissions in ...

The Thai government is preparing a series of tax incentives to promote a low-carbon economy and encourage green investments, as announced by Finance Minister Pichai Chunhavajira at the Bangkok Post Conference ...

The Low Carbon and Renewable Energy Economy (LCREE) Survey is the primary source of official information on LCREE activity in the UK. The survey was designed and developed in consultation with stakeholders from ...

Electricity market in Hungary Primary energy sources in Hungary Hungary's energy sector is diverse, with a mix of indigenous and imported sources. The nation primarily relies on fossil fuels, notably natural gas and ...

Transitioning to a decarbonised energy system by around 2050 is expected to save the world at least \$12 trillion, compared to continuing our current levels of fossil fuel use, according to a peer-reviewed study by Oxford ...

The figure shows Australian gross domestic product, energy consumption, energy intensity and energy productivity as an index from 1982-83 to 2022-23. As economic growth in Australia over recent decades has ...

The promotion of new energy vehicles (NEVs) represents a critical strategy for mitigating carbon emissions and air pollution. To evaluate the CO₂ and air pollutant reduction potential of NEVs ...

Guangdong province, an economic powerhouse in South China, has exceeded its carbon emission reduction target by exploring carbon emission trading based on total control, according to sources with an international forum ...

China's carbon neutrality goal by 2060 presents major challenges and opportunities for its electricity market. This study analyzes baseline, low-efficiency, and high-efficiency ...

The green and low-carbon transformation of rural energy systems focuses on the multi-energy complementary utilization of renewable energy to construct multi-agent collaborative operation ...

Nuclear energy offers a reliable and low-carbon source of electricity, aligning with Finland's commitment to environmental responsibility and greenhouse gas reduction. Alongside nuclear energy, Finland also harnesses ...

12 kWh low-carbon economy

Where Victoria's emissions come from More than 90% of Victoria's net greenhouse gas emissions * comes from burning fossil fuels to make energy. This energy is used for electricity, transport and fuel combustion. Electricity is ...

The Virginia Clean Economy Act (VCEA), with its demand to eliminate hydrocarbon fuels for electricity in Virginia, will soon take a deeper bite out of bank accounts for many Virginia families and businesses. As of ...

This study focused on investigating the performance of a spark ignition (SI) engine using ethanol-petrol blended fuels, with an emphasis on utilizing Artificial Neural Networks (ANN) for ...

China's renewable energy capacity is projected to double by 2030, reaching over 3,000 gigawatts, a significant expansion that underscores the nation's accelerating shift toward clean energy ...

The low-carbon economy optimization scheduling objective function is formulated, including two components: maximizing the energy self-sufficiency rate of integrated electricity-hydrogen ...

The strategic use of nuclear power also aids Belgium in meeting its energy demands while maintaining a low-carbon energy profile. However, discussions around nuclear energy's future in the country's energy mix ...

12 kWh low-carbon economy
