

It has been two years since the Law of Ukraine No. 3220-IX "On Green Transformation" came into force. Adopted on June 30, 2023, this legislation marked the end of the fixed "green" tariff ...

As Acciona Energía began construction of a solar PV plant in Peru, Spanish independent power producer (IPP) Zelestra inaugurated a 300MW solar PV plant, which became operational last month.

The United Nations Development Programme (UNDP) is running a tender for a hybrid solar system to support a wastewater treatment facility in northeastern Ukraine. The deadline for ...

Find Ukraine renewable energy bid invitations, tenders, bids, procurement, RFPs, RFQs, ICBs. Search for Ukraine renewable energy tenders online. A more comprehensive list ...

Intellihub is proud to announce a groundbreaking partnership with Bunnings to launch Zelora --a new solar and battery subscription service designed to make home electrification more ...

The International Renewable Energy Agency's latest report finds little change in the global average levelised cost of electricity for utility-scale solar plants year-on-year, while the global ...

Austrian solar technology firm Fronius has launched its new home battery system in Australia, completing its solar ecosystem. The Fronius Reserva offers seamless integration with existing ...

Solar energy is becoming an increasingly popular source of electricity in Australia. As of 2023, rooftop solar photovoltaic (PV) systems account for over 10% of Australia's electricity supply, ...

A new charge to export solar to the electricity grid has come into effect in South Australia. South Australian Power Networks has begun collecting the "export tariff" which comes at the same ...

The world's current trend toward energy instability shares some parallels with the 1970s oil crisis, which prompted an upsurge of United States and European solar research laboratories to ...

China-headquartered Trinasolar is seeking development approval to build what would be the biggest solar farm in Western Australia, as well as one of the largest battery energy storage projects in the state to cater for an anticipated 1.8 GW ...

Amid ongoing geopolitical tensions, Ukraine is grappling with unstable power grids and rising electricity prices. Local enterprises are accelerating the adoption of rooftop solar solutions, ...

Australia solar power kiev

A Virtual Power Plant is essentially a network of distributed energy resources (like home batteries, solar panels, EV chargers, smart appliances) that are coordinated via software to function as a ...

With the Ukraine Recovery Conference taking place in Rome on Thursday and Friday, European leaders have the rare chance to rethink Ukraine and Europe's energy strategy simultaneously. ...

Russia's constant bombing of Ukraine's energy infrastructure has sparked a groundswell of innovation in clean, reliable power, from building microgrids to solar power stations.

Kostentrends und Marktpotential In den letzten Jahren sind die globalen Batteriepreise weiter zur#252;ckgegangen, was g#252;nstige Bedingungen f#252;r die F#246;rderung von Solar + Energy-Speichersystemen in der Ukraine bietet.

A densely populated region in Asia, with very limited space for large solar parks or other large-scale renewable energy infrastructure, scarce natural resources, and heavy reliance on energy ...
