

To protect battery life during low workload periods, maintain partial charge (40-60% for Li-ion, 50-70% for Lead-Acid), store at 15°C-25°C, and avoid deep discharges. Use smart chargers ...

A 105Ah MD lithium battery refers to a medium-duty (MD) lithium-ion energy storage unit with a nominal capacity of 105 ampere-hours. These batteries typically utilize lithium iron phosphate (LiFePO₄) chemistry, delivering stable ...

Whether integrated with renewable energy or supporting grid stability, its design requires careful consideration. Battery Energy Storage System design is not just about selecting a battery; it ...

The Automotive Battery Management System (BMS) market is experiencing robust growth, driven by the surging demand for electric vehicles (EVs) and hybrid electric vehicles (HEVs). The ...

The visit focused on XIHO Energy's core product line: the main product customized battery pack covers multi-specification integrated systems such as home energy storage and industrial and ...

Indian Prime Minister Narendra Modi is set to visit Namibia this week, marking the final African stop on his five-nation tour. The visit reflects India's growing interest in strengthening ties with ...

NXP launched BMx7318, a lithium-ion battery cell controller IC. It is an analog front-end product made to monitor battery cells in electric cars and energy storage systems (ESS). It can ...

Lithium-ion forklift battery management systems (BMS) optimize performance, safety, and lifespan by actively monitoring cell voltage, temperature, and state of charge. Advanced BMS prevents ...

Latest Namibia tenders and bids. Source new opportunities with the biggest and most comprehensive platform for Namibia tenders and eProcurement. Track over three thousand verified tenders from public and ...
