

The Australia-US Researcher Exchange Network aims to strengthen Australia-US research ties, build Australian research capacity in battery technology, and ultimately contribute to the development of a robust ...

Macsen's current Sodium-Ion battery technology, using its Prussian White as cathode paired with a hard carbon anode, is well suited for applications such as battery energy storage systems ...

Berkeley Lab AMCR researchers have developed a machine learning framework that dramatically accelerates battery lifespan predictions--using far fewer experiments--by combining expert ...

It is regarded as the "Oscars of invention" by the research and development community, GM said in a press release. GM boasts that the CAB is built on a "groundbreaking" hybrid cell architecture that employs a capacitor ...

In addition to supporting technological innovation, the projects are expected to spur job creation and long-term investment in battery research and development, manufacturing infrastructure, ...

Bringing advanced battery research into real-world applications remains one of the most difficult challenges, requiring a three-stage, overlapping development process, argues Kieran O'Regan.

Two projects led by the University of Oxford have received a major funding boost from the Faraday Institution, the UK's flagship institute for electrochemical energy storage research. The funding is part of a £19 million ...

The electric vehicle (EV) battery market is experiencing rapid growth driven by increasing demand for EVs, stringent emission regulations, and government incentives. One of the most ...

The urban buzz around Panama City is fun and lively and the Panamanians are a friendly, welcoming people. Overall, no matter what time of the year you decide to visit Panama, I guarantee you'll have an amazing ...

Battery capacity aging detection equipment manufacturer identifies with Yishengda - EST group is a national high-tech enterprise that provides full industry supply chain services for the new ...

RECOMMENDED ARTICLES In the past decade, traditional leaders like Toyota, Panasonic, and Samsung have been investing heavily in solid-state battery research and development.
