

Voltalia, a global player in renewable energy, has been awarded two new turnkey EPC contracts by Ireland's semi-state utility ESB for the development of Carriglong (43.7 MW) and Clashwilliam (49.2 MW) solar power plants, totaling ...

The changes will permit private operators to build and operate electricity infrastructure. This will allow IT companies to connect directly to solar and wind farms to power their data centres.

ESB has reaffirmed its trust in Voltalia by awarding two new turnkey Engineering, Procurement and Construction (EPC) contracts for solar power plants, totaling 92.9 megawatts. The contracts cover the construction of the 43.7-megawatt ...

Large energy users like data centers and manufacturers could gain expedited access to at least 500 MW of solar deemed "ready to proceed" under the new, "more enabling" private wires ...

Ireland has made an impressive leap in its solar energy capacity, reaching a total of 1.76 GW. This remarkable achievement is split between 1.13 GW connected to the grid and 0.63 GW in ...

Delivery of Platin Power Station represents a total capital investment of up to EUR300m and follows SSE's decision, in February 2025, to progress Tarbert Next Generation Power Station in Co. ...

SACRAMENTO - Governor Gavin Newsom today announced California achieved an historic milestone - the state was powered by two-thirds clean energy in 2023, the latest year for which data is available. California is the largest economy in ...

The average wholesale price of electricity per megawatt hour fell for the fifth month in a row in June to EUR95.21, its lowest level since April 2024. On days last month with the most wind power ...

The projects, which total over 629 MW of installed renewable capacity spanning both solar and onshore wind technologies, are supported under Ireland's Renewable Electricity Support ...

Bord Gáis Energy has significantly strengthened its renewable energy portfolio with the announcement of multiple long-term Power Purchase Agreements (PPAs) with prominent ...

Solar PV systems generate electricity from daylight, not just sunshine. Ireland receives between 950-1,200 kWh/m² annually, with Waterford and the South East consistently at the higher end. ...

1. Gallanstown Solar Farm - 198MW Status - Active Coming online in 2022 Gallanstown Solar Farm in Co.

California solar energy ireland

Meath is owned by Octopus Renewables Ltd, a UK investment trust which invests in renewable energy infrastructure. ...

Ireland is at a critical juncture in its journey toward a sustainable future. As global temperatures rise and energy demands continue to increase, the urgency to transition away from fossil fuels ...

(The Center Square) - The Trump administration is ending preferential treatment for "unreliable" solar and wind energy, and the director of the Center for Energy, Climate and Environment at ...

A Cork-based Irish company developing large renewable energy projects worldwide. We are committed to sustainable, environmentally responsible methods in all our developments, minimizing the impact on other ...

EDPR NA Distributed Generation, the distributed generation business of EDP Renewables North America, and California Water Service have signed a 20-year PPA for a 2.35-MW DC onsite solar array at Cal Water's Northeast Bakersfield ...

For the first five months of 2025, CAISO data showed solar electricity curtailment declined by 12% as a share of generation, falling from 13% to 11.5%, even as solar output grew 18% year over ...
