

For most fleet operators, limited vehicle availability and high upfront costs are some of the biggest roadblocks to electrification. Despite improving total cost of ownership (TCO) for battery ...

The project consortium, coordinated by an Austrian Research Institute, is looking for a company (SME or bigger) acting as Original Equipment Manufacturer, who can cover all vehicle-related ...

The transition to passenger car electrification is a crucial step in China's strategic efforts to achieve carbon peak and carbon neutrality. However, previous research has not considered ...

According to Precedence Research, the global electric vehicle (EV) market size is projected to hit USD 2,529.10 billion by 2034 increasing from USD 890.72 billion in 2024, driven by battery ...

GM is enacting a reset of its production and product planning based on tariffs and Trump's other policies regarding battery-electric vehicles (BEVs) and emissions regulations. The budget bill ...

Based on the propulsion type segment, the market is segmented into Battery Electric Vehicles (BEVs) and Hybrid Electric Vehicles (HEVs). The BEV segment is expected to hold a notable ...

Plug-in hybrids (PHEVs) with an electric range of more than 80 kilometres will earn a full credit, putting them on par with battery-electric vehicles (BEVs). Previously, HEVs received no ...

However, North America is expected to witness a significant Electric Vehicle Sensor Market Share during the forecast period, owing to the penetration of battery electric vehicles (BEVs) across ...

Market segmentation reveals a strong preference for Battery Electric Vehicles (BEVs) over Plug-in Hybrid Electric Vehicles (PHEVs) and Fuel Cell Electric Vehicles (FCEVs), with BEVs capturing the largest market share.

A new study by the International Council on Clean Transportation (ICCT) estimates that battery electric cars sold today in Europe emit nearly 4 times less greenhouse gases over their lifetime ...

Nissan has unveiled the redesign of its flagship electric vehicle: the Leaf. The 2026 Nissan Leaf is a marked departure from previous editions of the model boasting longer range, more charging ...

The forecast period (2025-2033) anticipates significant market expansion across various segments, including battery electric vehicles (BEVs), plug-in hybrid electric vehicles (PHEVs), ...

## Canada battery electric vehicles bevs

Battery Electric Vehicles (BEVs) now dominate powertrain installations, making up nearly 71% of the total demand across major regions. Battery packs account for about 38% of the market ...

As Europe's electricity mix is getting cleaner, battery-electric vehicles (BEVs) are also offering a larger climate advantage than previously expected, according to the results of a new study ...

Amanda then discusses how adaptable Canada's auto industry is when it comes to electric and conventional vehicles with Flavio Volpe, President of the Automotive Parts Manufacturers Association. A big part of the push to EVs was to help set up the battery supply chain here ...

Santander : Yesterday, the EU officially launched an anti-subsidy procedure against Chinese imports of battery electric vehicles (BEVs). The launch of the investigation comes after Commission President Ursula von der Leyen ...

The global lithium-ion battery market for all-electric vehicles (EVs) is experiencing robust growth, driven by the escalating demand for electric vehicles worldwide. Governments' stringent emission regulations and increasing consumer ...

Electric vehicles (EVs) are revolutionizing the way we think about transportation, offering an eco-friendly alternative to traditional gasoline-powered cars. These vehicles run on electricity ...

Registrations of vehicles with plugs rose strongly as battery electric vehicles (BEVs) jumped 39.1% to 47,354 units, equivalent to a quarter (24.8%) of the market, and plug-in hybrid electric vehicles (PHEVs) grew 28.8% to 21,382 ...
