

JAKARTA (Reuters) -A lithium-ion battery plant by an Indonesian company and China's CATL is expected to be in operation by the end of 2026 with initial capacity of 6.9 gigawatt hours, an ...

(Bloomberg) -- The US Commerce Department will impose preliminary anti-dumping duties on imports of Chinese graphite, a key battery component, after concluding that the materials had been unfairly ...

Based on projections from Benchmark Mineral Intelligence, here's how the top lithium-ion battery-producing nations will stack up by 2030: China's dominance is staggering: It alone will supply ...

Looking for qualified li-ion battery suppliers in China? In this guide, we list some of China's leading lithium battery manufacturers. We also cover what you must know before importing li-ion or li-pol batteries: What types of lithium ...

Going global will be a key phrase for Chinese battery maker Contemporary Amperex Technology Co Ltd in 2023, as the world's largest maker of electric vehicle batteries has accelerated its overseas expansion over the ...

"Bloomberg: The China Show" is your definitive source for news and analysis on the world's second-biggest economy. From politics and policy to tech and trends, Yvonne Man and David ...

Definition and Technology Classification of Solid-State Batteries Solid-State Batteries (SSBs) use a solid-state electrolyte instead of the traditional liquid electrolyte to realize the conduction of ...

Electric cars are growing in popularity, and Chinese car brands are increasingly selling in the UK. Click here to find out the best Chinese electric cars available and compare new, used and leasing deals.

JAKARTA: A lithium-ion battery plant by an Indonesian company and China's CATL is expected to be in operation by the end of 2026 with an initial capacity of 6.9 gigawatt hours, an Indonesian ...

The Dept. of Commerce today revealed its preliminary antidumping (AD) rates in the trade case involving battery anode material from China. Almost every significant battery exporter to the ...

This disparity is further underscored by the fact that China's year-to-date battery capacity deployed, a good indicator of overall battery metals demand, surpasses twice the combined capacity of these competitors. Contact the Adamas team ...

Strategic licensing agreement aims to cut costs, expand global reach, and challenge lithium-ion's dominance

in long-duration energy storage Invinity Energy Systems is doubling down on cost ...

Beijing has added battery cathode material preparation technology to its restricted export list. The move affects lithium iron phosphate (LFP) and related technologies, requiring export licences ...

Europe's reliance on Chinese producers to develop its domestic cell production means that one third of the continent's total output will come from Chinese-owned companies by the end of the decade, Benchmark analysis shows. Data from ...

In a damning new report, researchers reveal how China came to control over 80% of the critical raw battery materials needed for defense technology -- posing an urgent national security threat.

Graphite powder, left, and powder made from nickel, copper and magnesium, right, which are used to make lithium-ion batteries, are displayed in the showroom of Chinese EV battery ...

Lithium: Despite the fact that 74% of the world's lithium is found in Australia and Chile, Chinese companies supply most of the production due to the global demand for batteries. Nickel: China has a strong control over the global ...

A team of Chinese researchers has made a groundbreaking breakthrough to revive aging lithium batteries by injecting a "shot" of lithium ions, potentially extending their lifespan from the typical 6-8 years or 1,000-1,500 ...

Stellantis, a Franco-Italian automaker, and Chinese battery giant Contemporary Amperex Technology Co Ltd announced on Tuesday an investment of 4.1 billion euros (\$4.3 billion) to form a joint venture that will ...

Several Chinese key players in the all-solid-state sector, including BYD, unveiled an ambitious timeline for producing the game-changing battery by 2027, which signals China's determination to lead in next-generation battery ...

Chinese battery maker Gotion High-Tech has launched the first road testing for its next-generation all-solid-state batteries, after completing the country's first fully localized 0.2 Gigawatt-hour pilot line, marking a milestone ...

"China has a certain technological advantage, as can be seen from the improvement of lithium battery R& D and lithium iron phosphate battery application technology, and then to the advent of new categories of batteries ...
