

The California Energy Commission (CEC) has given the green light to the Darden Clean Energy Project (DCEP), now officially the largest battery energy storage system in the ...

Hydrogen is a promising clean and renewable energy source; however, its efficient storage is one of the key challenges of establishing the sustainable hydrogen economy. The light main group ...

Energy storage news South Africa: Globeleq's Red Sands battery energy storage project eyes construction after financial close Construction at the Red Sands battery energy storage system (Bess) plant in South Africa's ...

This CEG report contains new analysis evaluating the feasibility of hydrogen power plants as long-duration energy storage resources, based on cost competitiveness as well as equity and ...

Selecting the right hydrogen storage method involves a careful consideration of various factors, including application requirements, infrastructure availability, cost, and safety. Compressed ...

The challenge with Renewable Energy sources arises due to their varying nature with time, climate, season or geographic location. Energy Storage Systems (ESS) can be used for storing available energy from Renewable ...

Google's partnership with Energy Dome to power its data centers will ensure that its electricity demands are met in an efficient, reliable - and most importantly - clean manner. Google ...

Eni is planning to launch phase 2 of the project in the fourth quarter of 2025, which will increase export capacity to 4.5 billion m³; annually, allowing the Republic of Congo to strengthen its ...

METASPACEX, a leading energy sector company, has announced a strategic partnership with Chongqing Bihe New Energy Technology Co., Ltd. (Chongqing Bihe) to enter the hydrogen ...

Organized under the patronage of President Denis Sassou Nguesso and supported by the Ministry of Hydrocarbons and Sociétés Nationales des Pétroles du Congo (SNPC), CEIF 2025 will serve as a critical platform for ...

A breakthrough in clean energy could unlock affordable, industrial-scale green hydrogen. For the first time, scientists have determined how to scale up decoupled water electrolysis, a technique that produces green hydrogen ...

Congo hydrogen energy storage

As the country advances its natural gas industry, the inaugural Congo Energy & Investment Forum (CEIF), taking place in Brazzaville this month, will spotlight strategies to enhance ...

?Journal of Energy Storage???????,?????SCI?????,"??"????????????????????? ...

Hydrogen storage is emerging as a long-duration solution for renewable energy systems, offering grid stability despite lower efficiency and higher costs. The Oxford Institute for Energy Studies ...

So-called liquid organic hydrogen carriers (LOHCs) offer a solution to the storage and transport problem. But inserting and extracting hydrogen into LOHCs requires catalysts that are often ...

Hydrogen storage used to be one of those niche industrial topics only a few insiders really paid attention to. But not anymore. Today, it's becoming a powerhouse in the global clean energy ...

The new liquid contains up to 6.9% hydrogen by weight, surpassing the hydrogen storage goals set by the U.S. Department of Energy for 2025. This discovery marks the beginning of a new ...

Latest news on energy storage projects, BESS, capacity expansion, and regulatory updates across Europe, US & Canada, Latin America, and Asia Pacific. Discover how energy storage solutions support renewable energy ...
