

Countries with the most solar power

Tourism and carbon emissions emerged as consistent, positive influences on solar energy consumption across most quantiles of the distribution. The analysis shows that countries with ...

This report will highlight the top 40 countries at the forefront of solar energy adoption, showcasing their efforts to combat climate change. Notably, China is currently leading the way in solar ...

Increasing Government Efforts to Maximize Solar Energy will Propel Industry Growth As the world shifts from fossil fuels to renewable energy sources, the same pattern has been witnessed in the Middle East countries with energy ...

IRENA (2025) - processed by Our World in Data. The renewable power capacity data represents the maximum net generating capacity of power plants and other installations that use renewable energy sources to produce ...

Solar takes top spot in the EU for the first month ever In June 2025, solar was the largest source of EU electricity for the first time, with multiple countries producing record amounts of solar power. Wind power in the EU started the summer ...

Solar energy continues to shine as one of the fastest-growing sources of electricity worldwide, with many countries seeing double-digit annual growth in solar installations. This graphic ...

Hydroelectric power remains an essential component of global efforts toward sustainable energy production and consumption. China accounts for 29 of the world's installed hydroelectric ...

China leads the world in solar power production with 307.9 gigawatts, accounting for two-fifths of global installed solar capacity. The top 5 solar countries in the world, based on their installed ...

This list of the Top 10 Solar Power Countries in the world is based on their total solar power capacity in gigawatts (GW) as of 2024. It shows how each country is using sunlight to power homes, industries and cities.

This data is based on the following sources The renewable power capacity data represents the maximum net generating capacity of power plants and other installations that use renewable energy sources to produce ...
