

The Trojan T-105 Plus 6V Flooded Battery is a deep-cycle lead-acid battery designed primarily for electric vehicles requiring sustained power delivery, including golf carts, low-speed industrial ...

Press Release, 23 July 2025 Southwest Research Institute (SwRI) has successfully completed its ambitious eight-year-long connected and automated (CAV) vehicle technology project. As part ...

Electric vehicles (EVs) have emerged as a pivotal technology for environmental protection, driving the development of battery energy storage systems (BESS) for sustainable charging solutions ...

With the escalating global demand for sustainable transportation, Fuel Cell Electric Vehicles (FCEVs) have emerged as a prominently researched domain. In light of this development, an ...

General Motors (GM) is supplying both used and new electric vehicle batteries to Redwood Materials, which is converting them into stationary energy storage systems, the companies ...

Electric vehicle (EV) batteries are rechargeable lithium-ion or solid-state systems storing 20-120 kWh to power electric motors. Key applications span cars, buses, e-bikes, and marine vessels. ...

Getting The Most Out of Dynamic Tariffs Through SolisCloud With dynamic tariffs becoming more common in some parts of the world, Solis offers smart energy management tools to help you get the most out of your energy system -- ...

Abstract Electric vehicles (EVs) are becoming increasingly popular, but their widespread adoption is still limited by issues such as short battery life and limited driving range. To address these ...

The latest vehicles will hit the streets of Riga before the end of summer. These are models similar to the previous 35 electric Urbino buses--12-meter, low-floor vehicles well known across ...

The IEC standard for battery energy storage system provides benchmarks for: Electrical safety Performance consistency Environmental protection Interoperability across systems Fire ...

Recent research published in "Carbon Neutrality" sheds light on the promising role of Thermal Energy Storage (TES) systems in the quest for carbon neutrality, particularly in the ...

The adoption of electric vehicles significantly contributes to reducing air pollution and reducing dependency on fossil fuels. However, integrating electric vehicles into power distribution ...
