

India PLI Scheme 18 100cr for advanced battery manufacturing

The lithium metal market size was valued at USD 15.3 billion in 2024 and is projected to reach USD 79.3 billion by the end of 2034, growing at a CAGR of 18 % during the forecast period ...

The production-linked incentive (PLI) scheme for solar photovoltaic (PV) manufacturing in India, aimed at boosting domestic production and reducing import reliance, has shown progress but ...

India has approved 48 projects under its production-linked incentive (PLI) scheme for domestic manufacturing of critical raw materials used in life-saving medicines, in a push to reduce ...

India's transition to electric mobility is accelerating fast--and lithium battery storage is the key engine driving that shift. As the country steps into 2025, the demand for cleaner ...

In 2022, Ola Electric was selected for the government's Rs 18,100 crore PLI scheme to set up 20 GWh of cell manufacturing capacity. The scheme required companies to set up manufacturing...

In fiscal year 2024-25, large-scale electronics manufacturing and pharmaceuticals received 70% of the production-linked incentive disbursements. These sectors led to a significant boost in ...

Homegrown telecom companies oppose the Central government's decision to allow multinational corporations under the PLI scheme to participate in Class-II government projects, arguing it ...

As a result, Ola will miss key milestones set under the government's INR18,100 crore PLI scheme for advanced cell manufacturing -- a move that not only triggers financial penalties but could also ...

India's Production Linked Incentive (PLI) schemes have emerged as a cornerstone of its industrial growth strategy, aimed at boosting manufacturing competitiveness, attracting foreign ...

In the fiscal year 2024-25, India's PLI scheme heavily favored the electronics and pharmaceuticals sectors, which claimed around 70% of the total INR10,114 crore disbursed. Specifically, ...

The PLI scheme for solar PV modules, which offers subsidies based on domestic value addition, has spurred investments in downstream inverter production. This creates a virtuous cycle: as ...

Enter the PLI (Production Linked Incentive) Scheme for Automobiles and Auto Components --a INR29,576 crore blockbuster that's already created nearly 45,000 jobs. Under this scheme, auto ...

India PLI Scheme 18 100cr for advanced battery manufacturing

As India advances its Industry 4.0 ambitions, connectivity is emerging as the backbone of smart manufacturing.. Driving India's Smart Manufacturing Future through eSIM, IoT, and Secure ...

The production-linked incentive (PLI) schemes have realised actual investment of Rs. 1.76 lakh crore till March 2025 across 14 sectors, which has resulted in incremental production/sales of ...

Performance linked incentive (PLI) has failed to drive progress in key emerging sectors such as advanced chemistry cell (ACC) battery storage and green hydrogen due to their dependence ...

The PLI scheme for advanced battery manufacturing (INR 18,100 crore), FAME-II subsidies for two-wheelers, and safety regulations like AIS-156 and IP67 are all helping create the right ...
