

Tomorrow's clean and renewable electric grid will be built on a foundation of flexible, responsive energy storage technologies. Supporting the equitable scale-up of those technologies, and the development of applications ...

The cancellations represent nearly \$3 billion in potential investments and threaten to slow America's energy transition, with analysts warning of potential 15-20% cost increases for utility ...

Italy ranks among Europe's top battery storage markets, driven by its MACSE auctions, capacity market, and early merchant efforts. Competition is growing amid rising micro and macro ...

50 percent renovation bonus confirmed for the whole of 2025 on the main residence (36% for the others). Superbonus 65 percent on expenses incurred in 2025, valid for batteries attached to a ...

Statistical Data Electricity data is without doubt Terna's most important operational data asset, with statistical processing for the entire sector at the national level amongst its ...

The Pumped Heat Electrical Storage (PHES) market is experiencing significant growth, driven by the increasing demand for energy storage solutions to address the intermittency of renewable ...

This obligation shall be treated as fulfilled only when at least 85% of the total energy stored is procured from Renewable Energy sources on an annual basis. There are several energy storage technologies available, broadly - ...

Energy storage technologies are being prioritised in order to improve system resilience and facilitate Italy's energy transition objectives, ranging from lithium-ion batteries to hybrid solar ...

L'electricit  in Italia   diminuita di 19,34 EUR/MWh o del 14,04% dall'inizio del 2025, secondo gli ultimi benchmark spot offerti dai venditori ai compratori quotati in megawattora ...

Thanks to the 50% tax deduction for building renovation and the energy communities starting in 2025, the economic return of a photovoltaic system with storage has shortened to 5-7 years, ...

Italy has taken significant steps in its green transition over the past decade but the current government under prime minister Giorgia Meloni is also determined to make the country a 'gas hub' in the Mediterranean Sea, ...

Italian energy storage electricity price policy

This connectivity allows for energy exchange with neighboring countries, influencing the electricity supply and pricing within the region. The EU's energy policies and regulations, ...

Recently, Jinko ESS has successfully won two 5MWh grid-scale energy storage projects in Italy, marking its official entry into the Italian large-scale storage market. The projects, scheduled for ...

Despite its achievements in renewable energy, Spain faces challenges in fully transitioning from traditional energy sources. Balancing the intermittent nature of renewable energy with the need for consistent electricity ...

Galileo said it is currently advancing a roughly 600-MW portfolio of battery storage projects in Italy, including another fully permitted BESS proposal in the southern parts of the country.
