Automakers showcase models and technologies at the 2024 World New Energy Vehicle Congress in Haikou, Hainan province, from Sept 27-29. CAO YINGYING/CHINA DAILY At the forefront of the low-carbon transition, the new ...

New battery technologies include expanded U.S. production for LFP batteries and a squishy solid-state battery design. Electric vehicles and other e-mobility experience high voltages and ...

Despite significant advancements in CMOS battery technology, several limitations continue to hinder the progress towards achieving optimal efficiency. One of the primary challenges is the ...

The new generation of battery technology is central to China's success in building electric cars that are considerably cheaper than electric and gasoline-powered cars made in other countries.

Optimizing liquid electrolyte formulations for Li-ion batteries is typically a massive time-demanding R& D endeavor. In a recent issue of Cell Reports Physical Science, Berg and Zhang et al. ...

There have been significant advancements in drone technology lately, revolutionising various industries and consumer uses. Originally created for the military, drones have evolved into versatile tools with endless possibilities, ...

What Are Solid-State Batteries? Solid-state batteries are at the forefront of the new wave of battery technology. Unlike traditional lithium-ion batteries, which use liquid electrolytes, solid ...

Apart from proposing to tighten export restrictions on battery cathode material preparative technology, China plans to enhance export curbs on specific technologies and processes used for extracting metallic gallium and lithium, ...

Huawei Technologies is a front-runner again in the smartphone market with a new phone powered by an advanced chip despite sweeping US sanctions, which may have a ripple effect on both Chinese and US ...

The Galaxy S26 Edge's battery could introduce a new battery material technology. The S25 Edge comes with a 3,900mAh battery, and the S26 Edge is set to outclass this phone. Similar to thinness, there's no data shared about ...

In a quiet laboratory in Daejeon, South Korea, a breakthrough is unfolding--one that could change the future of batteries as we know them. Behind this transformative discovery is Dr. ...

Chinese battery leader Contemporary Amperex Technology Co Ltd said on Tuesday that it will license its electric vehicle battery technologies to US automaker Ford Motor for the latter's battery factory in the state of Michigan in ...

Electric vehicles are undergoing a quiet revolution -- not just in how they're powered, but in what powers them. From ultra-fast charging systems to batteries that form part of the car's structure, ...

But despite being popular in China, EVs generally can cover 300-600 km after being charged, not enough for long-distance driving. True, there are EVs that can cover about 800 kilometers after one charge, but that's possible ...

Aceleron Energy Funding: \$10.6M Aceleron is using new battery technology to create the World's first recyclable, upgradeable and serviceable lithium-ion batteries to drive the global circular economy.

With a pure - electric range of nearly 1,000 kilometers, Mercedes - Benz's solid - state batteries are on the vehicle for testing, and more than 10 domestic and overseas enterprises are ...

The Galaxy S26 Edge's battery could introduce a new battery material technology. The S25 Edge comes with a 3,900mAh battery, and the S26 Edge is set to outclass this phone. Similar to ...

Fast-paced advancements in technology continually shape our wearable gadgets, making each new release anticipated with excitement. One such highly awaited launch is the CMF Watch 3 ...

China's tech talent is making significant strides in artificial intelligence (AI). The country is developing innovative applications that are gaining traction globally. Industry experts note that ...
