

China's BYD said on Tuesday it delivered 382,585 vehicles globally in June, marking a 10.5% increase from the same month last year. Of the total, 377,628 were passenger vehicles, ...

Guidance for car manufacturers on how to apply for their vehicles to be eligible for the Electric Car Grant. The guidance explains: how the scheme works vehicle eligibility the application process ...

Car production in the Czech Republic has declined slightly so far this year. While total unit numbers have fallen, the share of electric vehicles continues to grow significantly - almost one ...

According to CDV director Jindřich Friš, the impact of subsidies in the Czech Republic has plateaued, indicating that growth may decelerate. "There was a notable year-on-year increase ...

Kasikorn Research Center is of the view that the cumulative vehicle ownership of plug-in hybrid electric vehicles (PHEVs) and battery electric vehicles (BEVs) could reach ...

As the global shift toward clean transportation accelerates, understanding the trade-offs between Battery Electric Vehicles (BEVs) and Hybrid Electric Vehicles (HEVs) is essential--especially ...

China leads the market in the global comparison, with the US, Germany, and especially France trailing. Amsterdam, July 3, 2025 - As battery electric vehicles (BEVs) reach similar levels of ...

According to the SMMT, 24.8% of new cars registered in the UK in June 2025 were pure battery-electric vehicles (BEVs) whilst just 5.6% were diesels. Plug-in hybrids accounted for 11.2%.

Battery Electric Vehicle (BEV) A BEV runs entirely on electricity. Unlike traditional cars, BEVs don't have a gasoline engine; they get all their power from a rechargeable battery. This means ...

Battery electric vehicles (BEVs) remain the primary driver of growth in the European alternative fuels market. BEV sales outpaced plug-in hybrid electric vehicle (PHEV) growth, reflecting ...

The Czech Republic presents a fascinating paradox in this story. In June 2024, Czechia saw a remarkable surge in the registration of new battery electric vehicles (BEVs), with over 1,500 ...

This lineup will include six battery electric vehicles (BEVs), two plug-in hybrid electric vehicles (PHEVs), two range-extended electric vehicles (REEVs), and one internal combustion engine ...

A new report by the International Council on Clean Transportation (ICCT) finds that battery electric vehicles

Prague battery electric vehicles bevs

(BEVs) produce significantly fewer greenhouse gas (GHG) emissions than ...

Registrations of vehicles with plugs rose strongly as battery electric vehicles (BEVs) jumped 39.1% to 47,354 units, equivalent to a quarter (24.8%) of the market, and plug-in hybrid electric vehicles (PHEVs) grew 28.8% to 21,382 ...

Fuel cell vehicles (FCVs), which convert hydrogen into electricity via an electrochemical reaction, offer several benefits compared to internal combustion engine (ICE) vehicles and battery ...

The commission said it "has provisionally concluded that the BEVs (battery electric vehicles) value chain in China benefits from unfair subsidization, which is causing a threat of economic injury to EU BEV producers".

Imports of battery electric vehicles (BEVS) fell by more than 50 per cent in value during the 12 months to June 2025, when compared with the year prior, according to Stats NZ. The total value of passenger motor vehicle imports for the past ...

Passenger vehicles In the first six months of the year, 747,428 passenger vehicles were produced in the Czech Republic, i.e. 3.5% less year-on-year than in the same period of the previous ...

Yet, despite the clear urgency to shift towards Battery Electric Vehicles (BEVs), the current sales figures are troubling. As of mid-2024, BEVs accounted for a mere 12.5% of total vehicle sales. This is a far cry from the ...

Battery electric vehicles (BEVs) in Europe are now proving to be significantly more climate-friendly than petrol-powered cars, according to new findings from the International Council on Clean ...

According to a report by Electrek, a new study has provided quantitative evidence underscoring how battery-electric vehicles (BEVs) reduce the amount of brake dust generated. Conducted ...

Market segmentation reveals a strong preference for Battery Electric Vehicles (BEVs) over Plug-in Hybrid Electric Vehicles (PHEVs) and Fuel Cell Electric Vehicles (FCEVs), with BEVs capturing the largest market share.

As Europe's electricity mix is getting cleaner, battery-electric vehicles (BEVs) are also offering a larger climate advantage than previously expected, according to the results of a new study ...
