

Latest news on energy storage projects, BESS, capacity expansion, and regulatory updates across Europe, US & Canada, Latin America, and Asia Pacific. Discover how energy storage solutions support renewable energy ...

Construction has officially commenced on the Santa Teresa solar and storage facility, a significant renewable energy facility in Doña Ana County, New Mexico. Developed by DESRI (D. E. Shaw ...

India added a record 22 gigawatts (GW) of renewable energy capacity in the first half of 2025, marking a 57 per cent increase from the 14.2 GW installed in the same period last year, ...

The Australian High Commission in Mauritius in partnership with HSBC hosted a high-level renewable energy roundtable for Australian and Mauritian stakeholders in the energy sector on ...

It paves the way for the joint development of battery storage and renewable energy facilities aimed at enhancing the state's energy resilience and aligning with national sustainability goals.

The Oxford Institute for Energy Studies has found that hydrogen-based power-to-power, or PtP, technology could be crucial for global energy grids as they navigate the rising share of variable renewable energy, despite its ...

Construction at the Red Sands battery energy storage system (Bess) plant in South Africa's Northern Cape is imminent following financial close on 1 July. Once completed, the project developers said the plant will be one of ...

Google's partnership with Energy Dome to power its data centers will ensure that its electricity demands are met in an efficient, reliable - and most importantly - clean manner. Google ...

Israel's Augwind Energy has announced plans to build the world's first commercial-scale AirBattery energy storage facility in Germany, marking a major breakthrough in the race to ...

Mauritius is facing a growing energy crisis, with peak electricity demand nearly matching its generation capacity. To address this, the government has proposed the use of a powership, a ...

This obligation shall be treated as fulfilled only when at least 85% of the total energy stored is procured from Renewable Energy sources on an annual basis. There are several energy storage technologies available, broadly - ...

Renewable energy storage mauritius

The year 2024 was a milestone in the global energy transition. Renewable energy didn't just make gains, it shattered records and established itself as the undisputed economic powerhouse of ...

5. Next-Gen Energy Storage: The Heartbeat of Renewables Renewable energy is abundant--but not always reliable. The sun sets. The wind dies. Without effective storage, these fluctuations ...

The meeting focused on the progress of Qair's innovative STOR"SUN projects facilitated by the EDB. These hybrid plants integrate photovoltaic panels (PV) with battery energy storage systems (BESS) to provide firm and reliable renewable ...

A new renewable energy strategy will be unveiled by MARENA within a month. We are looking at floating PV, agrivoltaics, and battery storage. We bought a 20 MW battery and plan to buy ...
