

Israel's Augwind Energy has announced plans to build the world's first commercial-scale AirBattery energy storage facility in Germany, marking a major breakthrough in the race to ...

By incorporating storage, thermal plants can absorb excess renewable energy during peak generation and discharge it when renewable output is low or demand is high, maintaining a ...

The MoU covers the development of battery energy storage systems (BESS) and renewable energy projects, including solar and hybrid solutions, to strengthen the state's energy security ...

NTPC Green Energy Limited (NGEL), a subsidiary of NTPC Limited, has entered into a Memorandum of Understanding (MoU) with Bihar State Power Generation Company Limited (BSPGCL) to jointly develop battery energy storage ...

India has reached a significant milestone in its transition to clean energy by achieving 50% of its installed electricity capacity from non-fossil fuel sources, surpassing its 2030 target under the ...

The Oxford Institute for Energy Studies has found that hydrogen-based power-to-power, or PtP, technology could be crucial for global energy grids as they navigate the rising share of variable renewable energy, despite its ...

India added a record 22 gigawatts (GW) of renewable energy capacity in the first half of 2025, marking a 57 per cent increase from the 14.2 GW installed in the same period last year, ...

5. Next-Gen Energy Storage: The Heartbeat of Renewables Renewable energy is abundant--but not always reliable. The sun sets. The wind dies. Without effective storage, these fluctuations ...

Carbon capture and storage (CCS) is no longer just a future concept but is becoming a practical solution helping companies to plan cleaner energy projects and meet climate and sustainability ...

The addition of 582 gigawatts of renewable capacity in 2024 led to significant cost savings, avoiding fossil fuel use valued at about USD 57 billion. Notably, 91% of new renewable power ...

It paves the way for the joint development of battery storage and renewable energy facilities aimed at enhancing the state's energy resilience and aligning with national sustainability goals.

Nicaragua is shining brightly as a beacon of electric service coverage in Central America, as highlighted in a recent report from Prensa Latina. The nation has made remarkable strides, ...
