

Sodium-ion batteries, as an alternative to lithium-ion batteries, have garnered increasing attention. Due to the abundant and low-cost of sodium resources, sodium-ion batteries are seen as a ...

Part of the Romanian E-Infra Group, Nova Power & Gas announced the launched of the largest battery energy storage project in Romania. The installation in Florești, Cluj county, will have ...

Inverter batteries are used to store extra energy produced by solar panels during the day or PHCN power for usage at night or on cloudy days. In this article, we will look at the top ten solar battery brands in Nigeria, which include ...

Researchers have found a new, scalable method to recycle lithium-ion batteries that tackles two major challenges: the growing volume of battery waste and global demand for critical materials used in electric vehicles and other clean energy ...

Battery Energy Storage Systems (BESS) are at the center of this transformation, with new tenders and financing tools paving the way for increased deployment in the coming years. In this ...

A Delta flight made an emergency landing due to a passenger's personal battery catching fire. Lithium-ion battery fires on planes have increased significantly in recent years. Spare lithium ...

The piezoelectrically generated electric field by the extrusion of ZnO nanowires during Li plating reduces localized Li<sup>+</sup> concentration and promotes uniform Li<sup>+</sup> flux, effectively inhibiting lithium dendrites. This approach opens ...

Buried deep within the negative electrode of advanced lithium-ion batteries, silicide is stepping into the spotlight. Forget basic silicon; silicide offers a smarter path to the energy storage ...

An affiliated company Nova Power and Gas, part of the E-Infra group controlled by Romanian businessman Teofil Mureșan, is about to obtain a founding authorization to install the largest ...
