

Battery electric vehicles (BEVs) in Europe are now proving to be significantly more climate-friendly than petrol-powered cars, according to new findings from the International Council on Clean ...

Imports of battery electric vehicles (BEVS) fell by more than 50 per cent in value during the 12 months to June 2025, when compared with the year prior, according to Stats NZ. The total value of passenger motor vehicle imports for the past ...

In the first half of the year, more than 5.9 million battery electric vehicles (BEVs) were registered worldwide, a 37% increase compared to the same period in 2024. For comparison, full-year sales in 2024 had only grown by around 14%. China ...

Battery Electric Vehicle (BEV) A BEV runs entirely on electricity. Unlike traditional cars, BEVs don't have a gasoline engine; they get all their power from a rechargeable battery. This means ...

Hydrogen vs. Batteries: Is the Future of Cars Fuel Cells or Charging? The automotive industry is in a whirlwind of change, with electric vehicles (EVs) taking center stage. But while battery ...

The project consortium, coordinated by an Austrian Research Institute, is looking for a company (SME or bigger) acting as Original Equipment Manufacturer, who can cover all vehicle-related ...

In the first half of the year, more than 5.9 million battery electric vehicles (BEVs) were registered worldwide, a 37% increase compared to the same period in 2024. For comparison, full-year ...

The European Parliament's decision to ban the sale of new internal combustion engine (ICE) cars by 2035 is a bold move, signaling a significant pivot towards electric vehicles (EVs) as part of the EU's ambitious climate goals.

Fuel cell vehicles (FCVs), which convert hydrogen into electricity via an electrochemical reaction, offer several benefits compared to internal combustion engine (ICE) vehicles and battery ...

This paper explores the implementation of battery electric vehicles (BEVs) in underground mining operations, focusing on their benefits, challenges, and safety considerations. The study ...

According to the SMMT, 24.8% of new cars registered in the UK in June 2025 were pure battery-electric vehicles (BEVs) whilst just 5.6% were diesels. Plug-in hybrids accounted for 11.2%.

The UK government has reconfirmed its plans for a ban on pure petrol and diesel vehicle sales by 2030, with

Serbia battery electric vehicles bevs

hybrid vehicles following in 2035 for cars, leaving only zero emissions vehicles, of ...

As Europe's electricity mix is getting cleaner, battery-electric vehicles (BEVs) are also offering a larger climate advantage than previously expected, according to the results of a new study ...

Yet, despite the clear urgency to shift towards Battery Electric Vehicles (BEVs), the current sales figures are troubling. As of mid-2024, BEVs accounted for a mere 12.5% of total vehicle sales. This is a far cry from the ...

Both EU and Serbian officials emphasize the goal of keeping lithium processing within Serbia to build a full industry--from raw material processing to battery components and electric vehicle ...

These components are specifically designed for automotive batteries used in battery electric vehicles (BEVs) and plug-in hybrid vehicles (PHEVs), with the expansion finalized as of June ...

A new report by the International Council on Clean Transportation (ICCT) finds that battery electric vehicles (BEVs) produce significantly fewer greenhouse gas (GHG) emissions than ...

Battery electric vehicles (BEVs) remain the primary driver of growth in the European alternative fuels market. BEV sales outpaced plug-in hybrid electric vehicle (PHEV) growth, reflecting ...

Based on Linglong Tire's 2024 sales figures, consulting firm Frost & Sullivan has named the tyre maker the world's largest supplier of original equipment tyres for New Energy Vehicles (NEVs), ...

Market segmentation reveals a strong preference for Battery Electric Vehicles (BEVs) over Plug-in Hybrid Electric Vehicles (PHEVs) and Fuel Cell Electric Vehicles (FCEVs), with BEVs capturing the largest market share.

The research is clear: In major markets that make up 70% of global new passenger car sales, today's battery electric vehicles (BEVs) are associated with far fewer greenhouse gas (GHG) emissions than internal combustion engine ...

"The decision by the national government to invest in and support companies to develop battery electric vehicles (BEVs) was made in the year 2000. That means the authorities supported the ...
