

Interconnecting microgrids into the power frameworks forces significant difficulties concerning solid activity and control. Solid activity means having the option to deal with the microgrid in its ...

Slovenia's Ministry of the Environment, Climate and Energy has published an investment call to co-finance solar and wind power projects granted priority status. A total EUR29.5 million is ...

The application of a virtual synchronous generator (VSG) to provide virtual inertia in isolated microgrids has emerged as a promising control strategy for converter-inter-faced renewable ...

As an overview, one-third of Slovenia's energy comes from hydroelectric sources, with the other two-thirds coming from renewable energy in Slovenia that encourages a lowering of greenhouse gas emissions. Utilizing the power of ...

Husein and Chung (2018) [25] introduced financial aspects and technical feasibility of the campus microgrid in the case of Seoul National University, South Korea. Gao et al. (2018) [26] propose ...

Model predictive control (MPC) has emerged as a powerful control strategy for microgrids due to its ability to handle complex dynamics and optimization problems. This study aims to conduct ...

A comparative analysis of the classical PI and sliding mode control-based designs is conducted under various grid conditions, such as cold ironing mode of the shipboard microgrid, and load variations, considering both the AC and DC loads.

July 21 (SeeNews) - Slovenia's government said on Monday it will allocate a total of 51.2 million euro (\$59.7 million) in co-financing for the construction and upgrade of district heating and ...

To ensure the safe and stable operation of an islanded microgrid (MG) system, it is imperative to evaluate the impact of multiple communication constraints. This study addresses the ...

This paper gives a thorough overview of the technological advancements in microgrid systems, focusing on the Internet of Things (IoT), predictive analytics, real-time monitoring, ...

The multiagent systems are one of the recent advanced strategies that use multiple autonomous agents, and it is often integrated with other control techniques to ensure optimal performance ...

Slovenia microgrid control
