

The Government of Norway has previously contributed U.S. \$115.3 million to UNDP for Ukraine's energy recovery and green transition. These funds are being allocated to deploy high-capacity ...

The RISE initiative for solar energy in Ukraine aims to raise EUR100 million to finance up to 100 rooftop solar power systems with battery storage across the country. The initiative will support ...

The new agreement between the EIB, UNDP and GIZ comes at a crucial time, as Ukraine faces immense challenges to its energy security following extensive damage to its civil and energy ...

8 July 2025 Statement: European Parliament misses opportunity to fully anchor energy security in renewables and flexible electrification Today in Strasbourg, the European Parliament adopted its own-initiative report on the security of ...

Businesses are massively installing solar and gas generation, but most new facilities operate autonomously and do not sell their surplus to the grid. Although it seems illogical at first glance ...

Supporting Norfolk The Ukrainian delegation's visit to Spartek ECS was a proud moment for our team and the Wayland community. It reinforced our commitment to supporting Norfolk's efforts ...

All participants agreed: solar energy -- combined with smart grids and storage -- must play a central role in rebuilding Ukraine's energy system. And to get there, financial risks need to be ...

Construction began on Tuesday on the world's largest green hydrogen project, generated from solar energy, in the Xinjiang Uygur autonomous region, to aid China's move toward sustainable energy, said its operator China ...

It will help them to stay operational during outages and reduce long-term energy costs. Due to the ongoing attacks by russia, many schools and kindergartens experienced daily power supply ...

Amid ongoing geopolitical tensions, Ukraine is grappling with unstable power grids and rising electricity prices. Local enterprises are accelerating the adoption of rooftop solar solutions, ...

On July 4, President Trump signed the "One Big Beautiful Bill." The bill makes steep cuts to solar energy and places new restrictions on energy tax credits that will slow the deployment of ...

Key drivers include government incentives supporting renewable energy adoption, the decreasing cost of solar

energy systems, and ongoing research and development efforts to improve ETM ...

As Ukraine continues to face relentless missile attacks, the nation is simultaneously paving the way towards a sustainable energy future. Despite the ongoing conflict, Ukraine's commitment ...

Ukraine's reconstruction can become a model for the world -- a country rising from war to become a leader in climate and energy innovation. By choosing clean energy instead of ...

An analyst said China has been leading in renewable energy production figures for years and it is also currently the world's largest producer of wind and solar energy, as well as the largest domestic and outbound investor ...

In Ukraine, there is significant potential for integrating renewable energy sources into the energy system to ensure energy security and reduce dependence on fossil fuel imports. This study ...

The continent's greentech transition presents a strategic opportunity to address some of these barriers. For example, the development of solar plants and wind farms can mitigate energy supply constraints, thereby supporting downstream ...
