

Speech on the importance of renewable energy: Renewable energy is the power we get from natural sources like the sun, wind, and water. These sources never run out, unlike coal and petrol, which can run out one day.

...

Its properties, including high energy density and low boiling point, made it an attractive candidate for various applications. As the world shifted towards more sustainable energy solutions, ...

These eco-friendly insurance solutions cater to the unique challenges of renewable energy initiatives, offering financial protection against unforeseen events and facilitating project financing. In this article, we will ...

In recent years, the drive toward sustainability and environmental stewardship has led many farmers to explore renewable energy sources for their agricultural operations. Ecofarms, which ...

The renewable energy storage market has experienced significant growth in recent years, driven by the increasing adoption of renewable energy sources and the need for efficient energy ...

This Special Topic explores the vital role of sustainable and renewable energy in the global transition toward environmentally friendly practices. As the demand for energy grows, so do the challenges of reducing ...

Geneva, 1 July 2025: Accelerating renewable energy is vital in building a clean energy future - but it's not the whole story. Without solutions to manage intermittency, the shift to renewable ...

The global sustainable energy solutions market is experiencing robust growth, projected to reach \$136.17 billion in 2025, expanding at a compound annual growth rate (CAGR) of 9.4% from ...

As concerns over climate change and environmental degradation grow, green energy solutions have emerged as one of the most effective ways to reduce our environmental impact. From solar power to wind energy, ...

Energy intensity measured in terms of primary energy and GDP By 2030, enhance international cooperation to facilitate access to clean energy research and technology, including renewable energy, energy efficiency and ...

Countries are embracing green energy solutions to meet climate commitments, enhance energy security, and capitalize on economic opportunities in green technology. As fossil fuels deplete ...

Storage Solutions Are Rapidly Maturing: The primary challenge of renewable energy intermittency is being addressed through dramatic improvements in energy storage technology. Battery ...

Solutions to renewable energy

SLSEA - Sri Lanka Sustainable Energy Authority As the governing body responsible for pioneering the sustainable energy revolution in Sri Lanka, we aim to facilitate the development of our nation's rich energy resources, ...

President Ramaphosa highlights the Northern Cape's potential to drive South Africa's energy transition through green hydrogen and renewable energy projects, positioning the province as ...
