

The initiative introduced and tested four zero-energy, low-cost household-level ginger storage models--raw brick, improved pit, hybrid, and bamboo models--across 120 farmers (96% women). Each model had a 1 m³; capacity ...

Hydrogen's high energy density--1 kg can provide up to 50 kilowatt-hours of energy and drive a vehicle up to 70 km--offers a competitive edge over battery systems for certain mobility and ...

Today, Ideal Semiconductor announced that it has begun full-volume production of its first 150 V MOSFETs. While the technology was released in 2023, entering full-volume production is a ...

The supercapacitor electrolyte market is driven by several factors: the escalating demand for energy storage solutions in electric vehicles, the increasing adoption of renewable energy ...

Let Nepal plan, build and execute its own strategies to achieve its power sector vision by aligning investment flows with policy matters. The future of Nepal's energy sector is bright, diverse and ...

The market segmentation is expected to evolve significantly in the coming years. While specific segment breakdowns are unavailable, we anticipate growth in sectors such as grid-scale ...

Energy storage technologies include molten salt, liquid air, and cryogenic storage. With concentrated solar power, molten salt has turned into a commercially viable heat storage ...

The Lithium-Ion Hybrid Capacitor (LIHC) market is poised for significant growth, driven by increasing demand for energy storage solutions in diverse sectors. The market's expansion is ...

The sodium-ion rechargeable battery market is poised for significant growth, driven by increasing demand for sustainable and cost-effective energy storage solutions. While precise market sizing data is absent, considering the ...

The stationary energy storage segment's dominance is mainly due to the increasing demand for reliable and long-lasting power backup solutions in various critical applications. The growth in ...

Cross-border energy trading activity via interconnection has received much attention in Southern Asia to help the South Asian Association for Regional Cooperation (SAARC) region's energy ...

At the heart of this effort lies renewable energy--powering irrigation, food processing, and storage, and fueling

new agri-enterprises led by women. Community demonstration sites and ...

The Electric Double Layer Capacitor (EDLC) electrolyte market is experiencing robust growth, driven by the increasing demand for energy storage solutions in various applications, including electric vehicles (EVs), hybrid electric vehicles ...

Direct air capture (DAC), as a complementary strategy to carbon capture and storage (CCS), offers a scalable and sustainable pathway to remove CO₂ directly from the ambient air. This study presents a detailed evaluation of the amine ...

Specific energy storage applications nepal
