News Release US\$ 1.2 trillion in battery storage investments needed to support global renewable buildout  
Grid-forming battery technology emerges as critical solution for US\$5 trillion global ...

Investment in clean energy soared to \$2 trillion - \$800 billion more than fossil fuels. Solar and wind are now the cheapest sources of power on Earth, and clean energy sectors are creating...

This comes as the Australian Energy Market Commission (AEMC) predicts South Australia to begin to experience reliability gaps from 2026-27, highlighting the need for further energy ...

In 2025, global energy investment is expected to reach \$3.3 trillion -- the highest level ever recorded, according to the IEA World Energy Investment Report 2025. Clean energy will account for two-thirds of that total, led by investment in ...

Here are Spain's top 10 energy storage investors, who are shaping grid flexibility, energy security, and decarbonisation. These major investors are funding high-impact initiatives like lithium-ion ...

The Jackson Fuller Energy Storage Facility is located at the energy substation of the same name and occupies approximately 16 acres near Woodmen and Rolling Thunder Way, near Falcon. ...

In an article published in The Conversation the authors argue that rather than charging different prices by location, the UK should invest in large-scale energy storage to lower costs and ...

Zenobe Energy is the largest independent owner and operator of battery storage in the UK. It buys and manages grid-scale batteries for its commercial customers, such as utilities and electric-vehicle operators.

China's State Power Investment Corp has vowed to further tap digital ecosystems to improve the operating and maintenance efficiency of the country's vast, distributed renewable energy industry. SPIC Integrated Smart ...

Cost-Effective Energy Solutions While the initial investment in battery storage technology can be significant, the long-term cost savings are substantial. BESS helps in load leveling and peak ...

In 2024, onshore wind farms were the cheapest of all versus the lowest-cost fossil fuel alternatives, by 53% on average, while photovoltaic facilities were 41% cheaper. Of note, the ...
